new
in
canvas
prints!

what is photopanel?

photopanel is an exciting NEW wall decorating product. Made from a fine woven art canvas (see Photo Skin) mounted to a rigid lightweight panel.

photopanel is made up of an aluminium skin with a polyethylene Core, making it lightweight & durable.

The hanging system consists of a 20mm metal channel fixed to the back of the panel giving your photo panel a frameless floating off the wall effect with no visible fixings.

A picture hook is all you need.
(picture hook is included with all photo panel orders)

Super Thin
& Frameless

durable scratch & water
resistant clear satin finish

highest
photographic
quality

Using our eco-friendly photographic aqueous printing system, ensuring your print receives the best output available on the market.

Finished with a scratch & water resistant clear finish giving your photo panel print an archival rating of 120+ years (under normal indoor conditions)

Go to p.#03 on how to supply your image files.

gift vouchers available

photopanel
supplying your images

You have 2 options:

1. Supply your image/s to us and for a small fee we will set-up up the file ready for print output.

or

2. Supply your image/s in ready for print output
Via Email (8meg max. file size), Disk (CD or DVD)

Preferred files: PSD (photoshop), TIFF or Hi Res Jpeg.

Image Resolution: 300dpi (min. quality)

Colour Mode: RGB

Image size: choose from our standard or custom sizes, set-up at 100% scale and add a 10mm external bleed (this allows us to trim the 10mm excess flush with the board edge) before saving the file, adjust the image resolution from 300dpi to 120dpi and resize the image to the desired size.
